RE: Kansas Playground Surface/ Waste Tire Product Grant Program

Certification of Installation

Organizations receiving grant funding must identify a quality officer. The quality officer must be a Licensed Engineer, a Certified Playground Inspector, a representative of the manufacturer, or a manufacturer-trained installer.

The quality officer must complete this certification before final payment will be released.

	I am listed as the quality officer in the grant application with KDHE. The materials received and installed are the same as the waste-tire derived product that is listed by name in the grant application. This installation of the playground surfacing material conforms to the minimum depth required for the fall protection for the height of my playground equipment as indicated on the ASTM129 test provided by the manufacturer.	
	I am aware of the Consumer Product Safety Commission (Publication 325)	guidelines for Public Playground Safety
	This waste-tire derived product is installed according to installation guidelines.	the manufacturer's specifications and
l, was ons	(print name) withite during all construction activities related to the tire deri	(company), ved product at this location:
- <u></u>		and certify with my initials that
each of	the above statements is true.	
(Signature)	(Date)	

Regulatory Considerations

- The product manufacturer, not KDHE will be responsible for all warranty claims.
- The product supplier, not KDHE will be responsible for any installation training or guidance to warn users of any hazards, product storage or installation pitfalls.
- Installations of uncoated, all-black playground surface material will be required to have signage to warn users of the hazards (heat conditions and loose or dirty particles).
